REPOWER
— QUALITY —

Rebecca Power had been working as a quality specialist in the pharmaceutical industry for 12 years before setting up her own firm, Repower Quality, in January 2021.

A resident of Kinnegad, Co. Westmeath, Rebecca knows first-hand the pressure that quality teams in pharma firms are under, with heightened stress levels leading to issues with standards and increased staff turnover.

She responded by setting up a holistic and flexible consultancy service that engages frontline staff to address cultural issues, an offering that also extends to providing training, temporary staffing solutions and help with virtual admin tasks.

“Every pharma company needs to have a quality system. It happens that over time these systems become dated and staff get jaded. Repower Quality offers a range of programmes to combat this, from team culture transformation sessions, to updating systems to meet all the current requirements in a changing regulatory market,” says Rebecca, who counts market players Sartorius, Mias Pharma and Inno Pharma among her clients.

Rebecca plans to launch an online learning platform next month to streamline time spent on the most repetitive training programmes. The platform is targeted at smaller firms operating in the Midlands that don’t have the budget for repetitive in-person training.

ACORNS helped Rebecca bridge the gap between her professional know-how and lack of practical business knowledge.

“I know my job but I didn’t know how to run a business. ACORNS helped me understand my responsibilities in terms of finance, tax, accounting, marketing and how to set internal goals. It also taught me how to talk about my business and the benefits of networking outside your professional sphere,” she adds.

Providing early stage female entrepreneurs, living in rural Ireland, with the knowledge, support and networking opportunities to meet and even exceed their current aspirations.
